

# STEELE LOW-PROFILE FRONT PUGKNIFE

## **New front pugknife lasts longer and is designed to better pack the sealing auger.**

This knife incorporates a 'low-profile' shape that is shorter than standard pugknives but puts more wear-resistant 28PC chrome alloy where it is needed. The result is a long-lasting knife that efficiently packs the sealing auger but does not pack material into the 'dead-spaces' at the entrance to the sealing auger case.

The design of the replaceable blade protects the shank and minimizes bending forces. The patented APS-style shank can last indefinitely with proper maintenance.

***Get longer life, better performance, and reduced maintenance time by installing the new Low-Profile Front Pugknife from J.C. Steele & Sons.***

**The new Steele Low-Profile Front Pugknife can be installed in the 75 Series Pug Sealers and Combined Machines and the 90 Series Pug Sealers.**

*The Best in Clay Machinery Since 1889*
