

## Steele V-2 Dual-Channel Die Oil Pump

Higher efficiency motor with on-board VFD for improved lubrication control – ready to ship outside the U.S.

We continue to refine and improve our equipment, based on plant operator feedback.

- ✓ New SEW MOVIMOT® motor with on-board VFD for worldwide use (requires 3-phase power)
  - ✓ Three different relays work with all clutch requirements
  - ✓ Updated plumbing improves lubricant flow to both pump heads
- ✓ Small keypad with digital readout adjusts motor speed (mount in any location for easy access)
  - ✓ “Multiple” piston pump design minimizes pulsing
  - ✓ Works with oil- or water-based die lubricants
- ✓ Single pump can control oil pressure and flow rate at die back and front
  - ✓ Stop pump manually by holding both keys down for five seconds
