

VACUUM EXHAUST FILTER

Solve your vacuum system exhaust problems.

Eliminate long runs of piping and avoid environmental problems with the Steele Vacuum Exhaust Filter. Vacuum pumps can now be exhausted right inside the plant. Oil residue and water vapor in the pump exhaust is “coalesced” into larger drops that are collected in the base of the filter and drained away for disposal or recycling.

Specifications

Height: 30 3/4" (781mm)

Diameter: 28 5/16" (719mm)

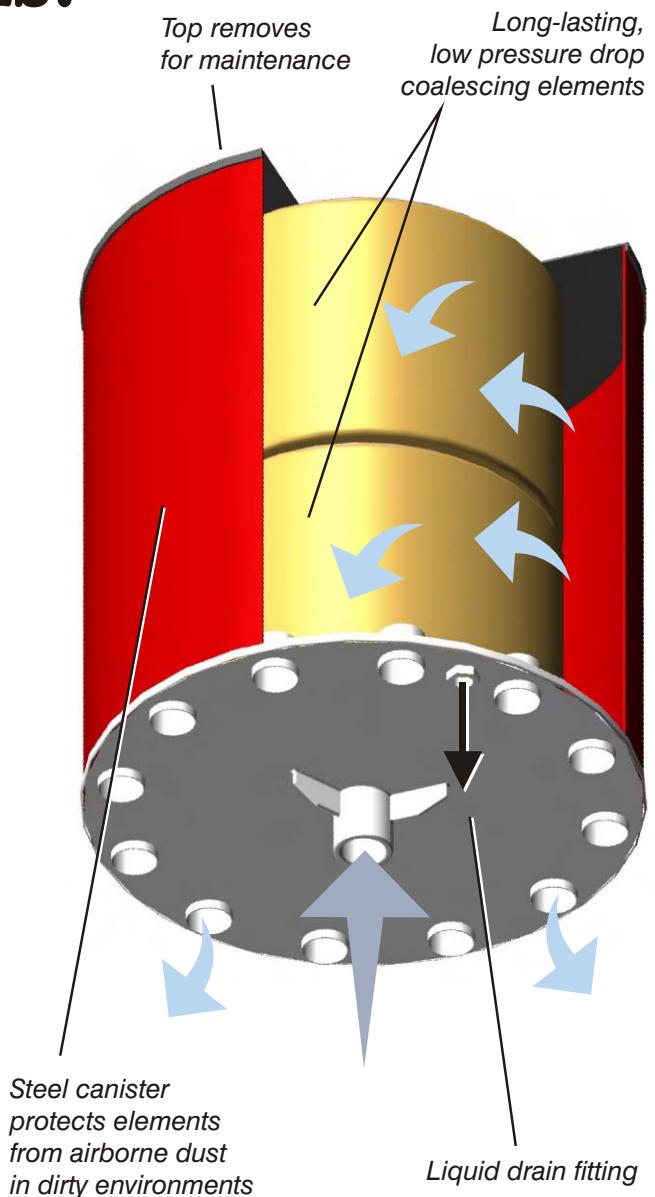

Weight: 150 lbs (68 kg)

Inlet fitting: 3" NPT female

Liquid drain fitting: 1" NPSC female

NOTE:

Always dispose of collected liquids in accordance with all applicable local, state, and federal regulations.
For a typical one shift operation, filter elements should last 12 to 18 months.
