

# The information machine operators need – when they need it

Our Technical Safety Bulletins (TSBs) are available online at [jcsteele.com/resources/downloads/](http://jcsteele.com/resources/downloads/), to help your equipment run better and safer with Steele tips, tricks and best practices.

Your questions, concerns and comments drive the development of TSBs, so we're always open to suggestions for new bulletins. To tell us what you want to see, email us at [tsbrequest@jcsteele.com](mailto:tsbrequest@jcsteele.com).

Steele QR codes connect machine operators to Technical Service Bulletins, for fast answers on installation, operations, safety and maintenance.

## Give your operators the advantage of our collective experience

TSBs give you 130 years of collective experience with material sizing and shaping machinery – how to improve extrusion efficiency, assemble new units, install pug shanks and knives, and much more.

Some TSBs include videos for enhanced explanations. Either way, they're backed by our parts and service professionals, who are ready to help 24/7.

TSBs are part of the Steele Document Library, which also features data sheets, catalogs and other product literature.

Use this simple block to help install sealing augers.
